

TECH TIPS NO 24a

Have you got the right distributor on your car.

It first came to my notice when one of our members said to me.” That the 126 engine had been completely refurbished but it had no 126 distributor so the garage had fitted a 500 which was the same”. **WRONG.**

I gave this info on the 500 chat web site 13th August 2001.
Now see the drawing below.
